

Excellent Clinics

Excellent Clinics develops and operates centers of expertise for high-complex outpatient care in close collaboration with hospitals and medical specialists. Excellent Clinics today operates a nationwide network of seven centers with the labels DaVinci Kliniek (complex wound care) and IvHG (hyperbaric oxygen therapy).

When ambition meets ambition

Excellent Clinics organizes **multidisciplinary care in an outpatient setting** in line with the principles of value based healthcare, thereby improving the quality, outcomes, patient service delivery and costs of the care provided. Excellent Clinics shares her expertise and data with collaborating hospitals, medical specialists and general practitioners, to enhance patient outcomes and gain valuable insights about indications and its care trajectories.

Her leading role and cooperation in the ecosystem, combined with **state of the art treatments and professionals**, enables Excellent Clinics to lead the process of complex, and chronic wound healing, thereby significantly reducing healing times and significantly increasing the number of patients who fully recover.

Together, we build a leading company

We support the vision of Excellent Clinics in providing specialized care in an outpatient setting. Backed by the expertise of our Health & Care team, Excellent Clinics will continue to develop its care offering beyond complex wound care and hyperbaric oxygen therapy. This will include amongst others support for the **innovative care activities** of Eurocept Homecare in the field of hemodialysis and chemotherapy at home.

With the **acquisitions** of DaVinci Kliniek in 2017 and the IvHG in 2018, **Gimv assisted Excellent Clinics in establishing a nationwide network of outpatient care clinics.**
