

GPNZ

GPNZ (Gesellschaft für Praxisnachfolge in der Zahnmedizin) is a healthcare buy and build project aiming to become a leading dental chain in Germany. The acquisition of high quality and successful dental practices with best-in-class dentists and staff fits in the consolidation move in a large but highly fragmented market. Benefits for both dentists as well as patients are clear. Dentists optimise their time use for rather administrative, HR, marketing or commercial tasks, they are more flexible in working hours and have less entrepreneurial risk. Patients can find more medical professionalism under one single roof and a smoother organization, either via bigger accommodation or broader opening hours.

The team in the headquarters is profoundly skilled in various healthcare fields (dentistry, hygiene, hospital management, etc.) in order to fully support the organic growth of the practices. Long-term mutual goal orientation is ensured by management's co-investment into GPNZ.
