

**rehaneo** is a leading provider of ambulatory rehab, aftercare, prevention and occupational health management across Germany. The company aims to provide patients with access to the highest quality ambulatory care and support their way to a fast and sustainable recovery.

## When ambition meets ambition

Together with management, we want to build a leading ambulatory rehabilitation provider in Germany by pursuing a focused M&A strategy. Further, the ambulatory rehab centers will be extended by medical therapy centers – providing physio, ergo and speech therapy – to create an integrated ambulatory service offering for the patients. Highest quality standards and patient satisfaction are at the core of the growth strategy and contribute to rehaneo's goal to facilitate rehab before early retirement or before care.

### Together we build leading companies

We are excited to support the management team in implementing this buy-and-build project that also fits perfectly with the strategy of our Health & Care platform.
