

Fronnt

Lenaerts, ABN Climatization and Climawest form the foundation of the new group.

Lenaerts/LVR (Houthalen-Helchteren - www.lenaertsnv.be, turnover €16m, 45 employees) was founded in 1981 and has grown into an established player in the world of industrial installation techniques, with a focus on electrical engineering.

ABN Climatization (Munsterbilzen - www.abn.be turnover €11m, 47 employees, founded in 1996) and Climawest (Kortrijk - www.climawest.be, turnover 11mio, 45 employees, founded in 2000) are specialists in retail, office and industrial HVAC techniques.

When ambition meets ambition

Bringing together various companies allows to accelerate the investments in digitalization, automation and talent management, and thus to even better serve customers. The current owners of Lenaerts/LVR, ABN Climatization and Climawest will reinvest in the new group and remain involved in their respective companies. They will actively support the further expansion of the installation company.

Together, we build a leading company

We are convinced of the need for strong multi-technology installers to help realize the energy transition. Lenaerts, ABN Climatization and Climawest form a strong basis for consolidation in the fragmented sector of technical installation companies. We have the ambition to further expand this new group through additional acquisitions. We look forward to realizing this vision together with the management.
