

Life Sciences Analyst (intern) position at Gimv

Our Company

Gimv is a leading European investment company with 40 years experience in private equity and venture capital. Listed on Euronext Brussels, Gimv currently manages a portfolio of around 55 companies with a combined turnover of EUR 2.8 billion and 15.000 employees.

As part of its Health & Care platform, Gimv's Life Sciences investment team is well established and recognized as one of the leading European life sciences venture capitalists, investing in biotech and medtech. The team has built a successful track record in identifying high potential innovation across the life sciences sector, and providing capital, expertise and networks to accelerate product development, commercialization and successful exits for our portfolio companies. To date, Gimv manages an exciting life sciences investment portfolio and is actively pursuing new investments.

Your Role

We offer a 6-month Intern-Analyst position in our Life Sciences team in Munich. You will work on dedicated projects, primarily related to new investment opportunities. You will participate in due diligence, assessment of scientific and product development plans, analysis of markets and competitive environments, evaluating and benchmarking business models, and landscaping of therapeutic areas/indications. As an intern you will support the team throughout the full procedure of new investment opportunities, and will also have the ability to:

- Become familiar with industry standard research engines and databases
- Develop your investment and financial analysis skills
- Gain industry insights through close collaboration with our experts
- Develop your soft skills and network through internal and external meetings

We offer a market standard compensation package, completed with on-the-job training, as well as a challenging environment with room for own initiatives.

Your background

- Sound scientific, medical or technical qualification with a strong business interest.
- Recently completed your PhD or Msc, or have had a first working experience
- Outstanding analytical skills with the ability to understand the scientific and technical aspects of life sciences and translate them into business investment opportunities.
- Outstanding English communication skills both verbally and in writing, with the ability to present complex issues in a clear and concise way and to adapt communication style to different audiences.
- Result-oriented team player, self-driven and passionate individual
